Future City Summit 2017 is a five-day international academic program to be held in early August 2017 in Hong Kong. Thanks to the unfailing support from the universities in the region last year, Future City Summit endeavours to generate a greater impact this year.

In the prevalence of globalisation, the increasing world population has an urgent call to make the cities more safe and resilient as one of the 17 Sustainable Development Goals. Therefore, the interactive conference this year focuses on *Fast Forward to 2030: Megacity - The New Land of Opportunity and Crisis*.

Would you like to be the pioneer to reconstruct our future?
