

Together, We Can Promote Economic Inclusion

For The Bottom Billion!

Building an Offline App Store for the Bottom Billion

Volunteers Needed!

Do you want to help lift communities out of poverty? Do you want urban slum dwellers to be connected to an economy rather than just given charity? Do you want to help build the World's first Offline App Store for the Bottom Billion?

We are Mandala Group and we need your help!

Through our online volunteering platform, you can develop your professional skills whilst helping to fight poverty. Through our summer internship program, you can visit India to see your impact in Action.

Mandala Group is a Social Enterprise, building an App Store for the Bottom Billion. Our mission is to lift communities out of poverty by promoting economic inclusion through mobile phones.

By focusing on Education, Finance and Health, Mandala Group combines business and charity with technology and basic tools to provide a platform for social entrepreneurs to deliver their solutions. We plan to create a range of mobile phone based solutions for end users, focusing to develop offline solutions to match our user's current level of technology, which is through a cloud telephony system. By providing the tools needed, Mandala Group aims to help communities to lift themselves out of poverty.

We have created an online volunteering platform so anyone from anywhere can join us to help build the App Store! The volunteering has a wide range of activities - we have a place for everyone who's interested!
